Re Water Supply to French Rocks

I have the honour to state that on 25th December 1941 a telephone message was received from the Superintendent, Vani Vilas Water Works, Mysore, that there was some trouble in the motor at French Rocks and that after necessary examination it was found that the internal wiring was grounded somewhere. The Superintendent intimated this office that the water supply would be stopped until arrangements were made for getting some other machinery. He was immediately informed that he might obtain from Mandya the 10 H P motor that is available as a spare, and that the same may be utilised for restoring water supply at French Rocks. The Superintendent, replied on 28th December 1941 that the Mandya motor and starter were brought on the 26th itself and tested, and though they were found to be in order, they could not be utilised immediately since the bolt holes of this set did not fit with those of the existing unit at French Rocks. Hence in order to restore the water supply, he arranged for the installation of another pumpin. set obtained from the Karapur Camp and restored the water supply on the 29th of December 1941.

The motor that is removed from French Rocks has been sent to the Electrical Department for necessary test and rewinding, and the original arrangements would be restored after this motor is sent back.

All this interruption in water supply could have been avoided if a duplicate pumpin. set had been installed in connection with the water supply.
